SUMMARY

Motivated and self-driven Frontend and Full-Stack Developer with hands-on experience building responsive web applications, business websites, and interactive user interfaces. Skilled in React, JavaScript, Python, modern web technologies, and responsive design principles. Strong interest in cybersecurity, networking, and Linux systems administration. Passionate about building secure, high-performance digital solutions while continuously expanding expertise in software development and cybersecurity.

EDUCATION

Self-Taught Software Developer, Focused Studies: Frontend Development, Full-Stack Web Development, JavaScript Ecosystem, React Development, Python Programming, Linux Administration, Cybersecurity Fundamentals

EXPERIENCE

Frontend & Web Developer

2025 – Present

Freelance & Personal Projects

- Designed and developed responsive websites using React, JavaScript, HTML, and CSS.
- Built mobile-friendly user interfaces following modern design standards.
- Developed portfolio websites and business landing pages optimized for various devices.
- Implemented interactive functionality using JavaScript to enhance user experience.
- Managed source code using Git and GitHub.
- Applied performance optimization and responsive design techniques to improve usability.

PROJECTS

Personal Portfolio Website | Technologies: React, JavaScript, Tailwind CSS

- Developed a professional portfolio website showcasing technical skills, projects, and services.
- Implemented responsive layouts for desktop, tablet, and mobile devices.
- Designed modern user interfaces with a focus on performance and accessibility.

Business Landing Page | Technologies: HTML, CSS, JavaScript

- Built a responsive business website focused on customer engagement and lead generation.
- Implemented modern UI design and mobile-first development principles.
- Optimized website performance and user experience.

Interactive Web Application | Technologies: JavaScript, React

- Developed dynamic user interfaces using reusable React components.
- Implemented state management and interactive functionality.
- Maintained clean, scalable, and maintainable code architecture.

TECHNICAL SKILLS

HTML5

CSS3

JavaScript (ES6+)

React.js

Tailwind CSS

Responsive Web Design

UI/UX Design Principles
Python
REST API Integration
Node.js (Learning)
Express.js (Learning)
Network Scanning and Enumeration (Nmap)
Packet Analysis and Traffic Monitoring (Wireshark)
Linux Administration
Bash Scripting
TCP/IP Networking
DNS, HTTP, HTTPS Protocols
Network Troubleshooting
Security Fundamentals
Vulnerability Assessment Fundamentals
Git
GitHub
VS Code
NPM
Vite
Linux
Chrome Developer Tools
Problem Solving
Debugging
Version Control
Cross-Browser Compatibility
Mobile-First Development
Performance Optimization
Analytical Thinking
Continuous Learning

CYBERSECURITY KNOWLEDGE

Experienced in network scanning and reconnaissance using Nmap. Skilled in packet capture and network traffic analysis using Wireshark. Comfortable working in Linux environments and command-line interfaces. Able to write and modify Bash scripts for automation and system administration tasks. Understanding of networking concepts including TCP/IP, DNS, HTTP, and HTTPS. Familiar with secure development practices and cybersecurity fundamentals. Actively expanding knowledge in cybersecurity, network defense, and security operations.

ADDITIONAL INFORMATION

Available for Frontend Developer, Web Developer, Junior Full-Stack Developer, and Entry-Level Cybersecurity opportunities. Strong commitment to continuous learning and professional growth. References available upon request.
